

Don David Gold Mexico – Mine Planning & Services, On-Site Support Arista Mine, Oaxaca, Mexico

JDS Energy & Mining Inc.

JDS was commissioned by Don David Gold for the development and engineering of the Arista underground mine. JDS provided an on-site engineer for several weeks at various times in the mine life to establish short and long-term mine plans and reserve estimates, to ensure mine services (ventilation and de-watering) were developed and maintained and to train local engineers.

JDS also provided engineering and construction management services for the equipping a ventilation raise with power and de-watering services with a unique, cost-effective solution that did not require any personnel to actually work in the raise.

All project management, design, engineering, and planning services were provided by JDS.

Project Value: \$500K
