

CuVeras LLC – Mine Re-Start, Engineering & Permitting Support

Bul River Project, Cranbrook, British Columbia, Canada

JDS Energy & Mining Inc.

JDS' developed a plan to re-start the Bul River mine to safe, sustainable commercial production as expeditiously as possible and within defined budgets.

Focus of work included developing mine and waste management plans suitable for permit application and operations, audit of existing on-site facilities, managing and leading necessary test work, and developing a project execution plan and budget to bring the project to commercial production. JDS was a leader in submitting the permit application to restart the mine, mill, and tailings facility.

Project Value: \$1M
